

TRUSTWORTHY SECURITY.

The first priority of Casoro Safes is to provide security you can trust. To that end, we look to nationally and internationally recognized leaders in independent testing to verify the quality of protection our safes provide.

1 WE OFFER INDEPENDENT VERIFIABLE TESTING VS. COMPETITORS' MARKETING TACTICS AND PLAY ON WORDS.

Underwriter's Laboratories (UL) has been "*working for a safer world since 1894.*" You know them as the company that gives you confidence your light bulbs and electrical cords will work and be safe. UL tested their first safe in 1923 and established the Burglary Test Division in 1925.

They have tested and independently verified the burglar protection of **100%** of our Casoro Safes.

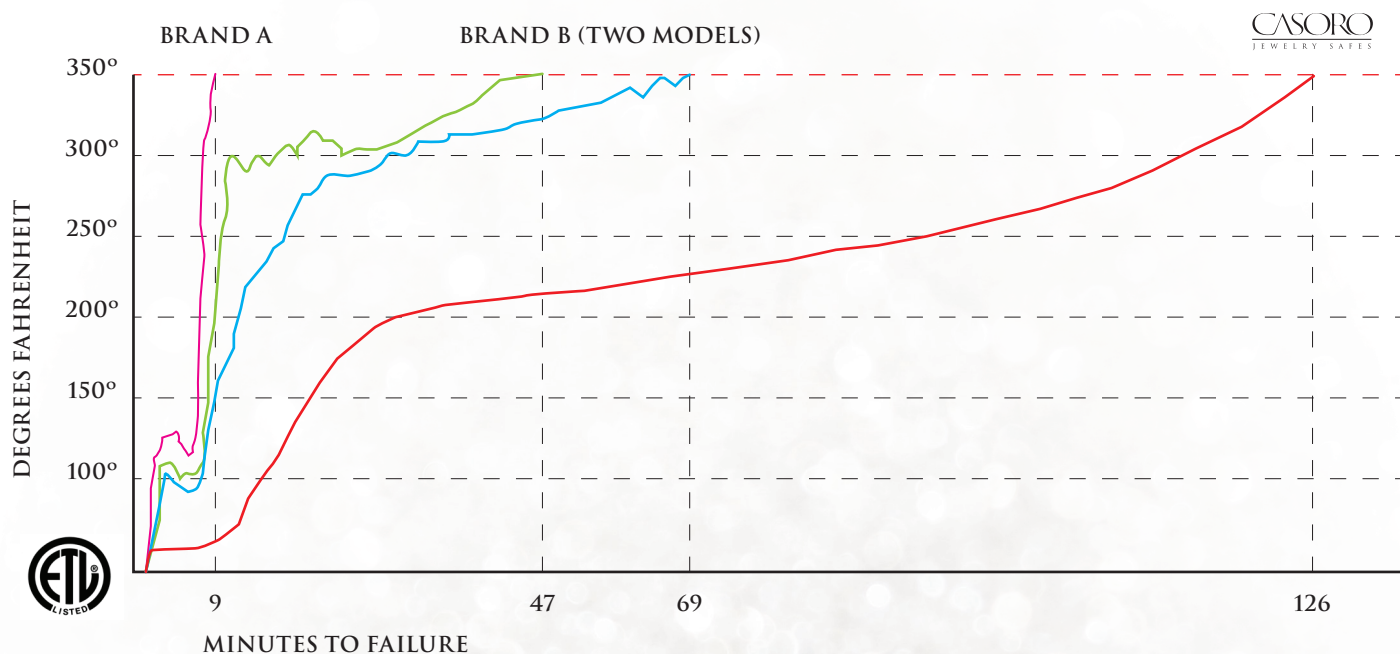

2 100% OF OUR PRODUCT LINE HAS BEEN INDEPENDENTLY VERIFIED TO OFFER SUPERIOR BURGLAR PROTECTION.

CASORO

JEWELRY SAFES

UNMATCHED SECURITY, UNPARALLELED LUXURY.

3 INDEPENDENT TESTING VERIFIES OUR FIRE RESISTANT SAFES LIVE UP TO OUR CLAIM.

	RATING CLAIM	ACTUAL
BRAND A	120 MIN.	9 MIN.
BRAND B	60 / 150 MIN.	47 / 69 MIN.
CASORO	120 MIN.	126 MIN.

Some manufacturers make claims they can't back up when put to the test, see above. These test results demonstrate the importance of independent verification. Don't be fooled by marketing tactics and an aggressive sales person. Whatever safe you buy, be sure it has been independently verified for the protection you need.

ETL (Edison Testing Laboratories) has been bringing quality and safety to life through testing and certifying for more than 130 years. Today the ETL Listed mark is featured on millions of products sold by major retailers. ETL is well-known and widely used in the safe industry to verify fire protection claims. Our fire resistive models have been tested at independent labs, ETL or UL, to establish a reliable expectation for protection from fire.

Our safe bodies are built for us by American Security Products in Fontana, CA and we manufacture the custom interiors at our facility in Santa Ana, CA.

A letter from American Security Products: 

"These safes are 100% produced in our California factory. Our TL rated safes are trusted by such companies as Chase Bank, Zales Jewelers and Cinemark Theatres to protect their corporate assets."
